PROJECTS

Spotify-Clone— Full-Stack Music Streaming Platform

Tech Stack: React, Vite, Node.js, Express, MongoDB, JWT, Tailwind CSS

- Developed and deployed a scalable music streaming platform with secure JWT authentication, login/signup flows, and user-role-based session control. Integrated REST APIs to serve real-time music data from MongoDB, replacing static content. Managed seamless state handling and navigation using React Context API and modular routing.

CareerConnect — Placement & Recruitment Portal (Frontend Developer)

Tech Stack: React, Tailwind CSS, Python, MongoDB

- Designed and built responsive, role-specific dashboards for students, TPOs, and recruiters. Collaborated on API integration for secure login and data exchange. Created reusable UI components for listings, profiles, and application views with strong emphasis on accessibility and performance optimization.

TrendPulse — Real-Time News Aggregator

Tech Stack: React, Node.js, Express, GNews API, Vercel

- Implemented a real-time news platform with live data fetching via GNews API. Built category-based filtering and dynamic rendering for enhanced user experience. Deployed the frontend on Vercel and managed version control with Git for agile iteration and continuous delivery.
